OUTPUT:

```
Enter the number of vertices: 5
Enter the cost adjacency matrix (enter 999 for no direct path):
0 10 5 999 999
999 0 2 1 999
999 3 0 9 2
4 999 999 0 7
999 999 999 6 0
Enter the source vertex (starting from 0): 0
The output will be
Shortest Paths from Source Vertex 0:
Path to vertex 1: Cost = 8 | Path = 1 <- 0
Path to vertex 2: Cost = 5 | Path = 2 <- 0
Path to vertex 3: Cost = 9 | Path = 1 <- 3 <- 0
Path to vertex 4: Cost = 11 | Path = 2 <- 5 <- 4 <- 0
```
